

AVERAGES

Arithmetic mean = 30.6
36

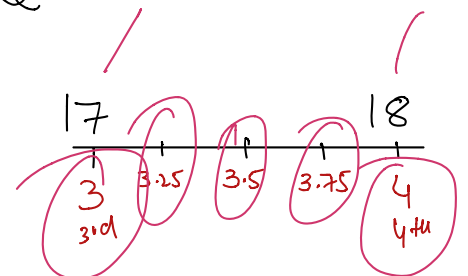

Computing quantiles:

$$0.25 \rightsquigarrow \left\{ 0.25 (16+1) \right\}^{\text{th}} \text{ value}$$

0-based index →

$$-1 \quad 3.25^{\text{th}} \text{ value} \quad 4.25^{\text{th}} \text{ value}$$

$$\text{quantile}(0.25) = 17.25$$

Magnitude of values is not clear!
